SAUTER FH series (not included)
 Included in AFH-FD
 Included in AFH-FD
 (not included)

AFH FD software is designed for all applications that require the measurement of forces, depending on the displacement.

Typically these are force progression graphs in penetration tests or pull-out tests.

These are the main characteristics of AFH FD:

Universal and easy application – The software only requires:

- SAUTER FH series force gauge
- SAUTER LA series length meter

As soon as these components can be used, the AFH-FD Force-displacement software can be adopted to **any test stand, any type of machine or moving device.**

- **Quick data transfer speed:** up to **20 sets of data** per second

The measured data, captured in the AFH FD software can be stored, printed or can be exported to Excel for further analysis...

Output format .XML (MS Excel).
 Connectable cables (RS 232 cable is included) RS 232 / USB

Optional: RS 232 to USB (converter unit)
 SAUTER AFH 12: € 85,- net

Model	Price, excl. VAT
AFH FD	€ 650,-
